## How do I know when to go to the Emergency Room vs. an Urgent Care Center?

An EMERGENCY is the sudden and unexpected onset of conditions requiring immediate medical attention. Such emergencies include: heart attacks, strokes, poisoning, loss of consciousness and loss of breathing. Plan facilities should be used whenever possible when seeking emergency room care. URGENT CARE is care that you need sooner than a routine doctor's visit. URGENT CARE IS NOT EMERGENCY CARE. Some examples of urgent care include: most broken bones, sprains, minor cuts, minor burns, most drug reactions and non-severe bleeding. CONVENIENT CARE are clinics that treat uncomplicated minor illnesses. Some examples of convenient care include: allergies, athlete's foot, bladder infections, seasonal flu symptoms, cold sores, ear infections, impetigo, insect bites, laryngitis, minor burns and rashes, minor sunburn, mononucleosis, pharyngitis, poison ivy, ringworm, sinus infections, sore throat, swimmer's ear and upper respiratory infections.
