	Notes:						
			These drugs are all medical injectable drugs, and are not listed on the Dean Health Plan drug formulary. The on-line formulary only lists drugs covered by the pharmacy benefit.	There are claim specific edits for many of these drugs. The edits limit the uses of these drugs to approved indications and dosages. In addition, Dean Health Plan has payment restrictions consistent with Dean Health Plan Medical or Drug Policies.		The Health Plan will not cover U.S. Food and Drug Administration (FDA) approved drugs that are new to the market until the Pharmacy and Therapeutics (P&T) Committee formally reviews and grants approval, within a maximum timeframe of 1 year from FDA approval. If a provider believes that use of a new drug is medically necessary prior to P&T Committee approval, they may submit an exception to coverage form
